HOW TO GET GREAT RESULTS WITH RETIN-A OR DIFFERIN

- 1) Use a mild soap such as Dove or Cetaphil to cleanse your face.
- 2) Apply a pea-sized amount to your entire face at night only; applying more will only cause irritation.
- 3) Expect a flare of your acne during the first few weeks of therapy – this is normal!
- 4) It takes 3 months for the medication to work completely!
